Summary

Salam, I'm Muhammad-Jibril Bashir Abba Al-Sharif, aka. Khalifa MBA, aka. Al-Fellati Al-Sharif, an SDE, TPM, Architect, Researcher (altogether a 'STAR') specializing in Web3/Blockchain, AI/ML, Cloud and Full Stack development, with a passion for creating intuitive, functional, scalable and user-centric software products with quality experience.

I've been learning Software Development and Engineering, starting with web development and Cyber Security from the very young age of 12 when I first came across the internet. It was then that I decided to work in this field and become a billionaire to help people.

With 14+ years of experience in the field from the very young age of 12, so I think I can humbly say that I have spent more than half my age building and contributing to the field doing what I love, therefore acquiring over a decade of experience in my field. I am always looking for new and innovative ways to bring my vision to life.

I believe that building products is about more than just creating functional systems to solve problems – it's also about creating intuitive, scalable and enjoyable experiences for both users and developers.

I actively contribute to advancing decentralized web technologies and cutting-edge internet protocols. I love Research and Development of Decentralised Web technologies just as much as I love teaching and learning foreign languages, cultures and history. I also enjoy playing football (soccer), basketball and snooker(pool/billiards). I also enjoy reading and writing, as well as drawing - so, I think can humbly say that I'm both a scientist and an artist, and engineer and a researcher..

Whether I'm working on a website, mobile app, web3 dApp, blockchain, algorithm or other digital products, I bring my commitment to composability, documentation, design excellence and user-centric thinking to every project I work on. I look forward to the opportunity to bring my skills and passion to working with you on your next project.

I bring my commitment to composability, documentation, design excellence and user-centric thinking to every project I work on.

I look forward to the opportunity to bring my skills and passion to working with you on your next project.

✉️ Let's connect and explore opportunities in Web3/Blockchain, AI/ML, Cloud and/or any digital software and all the diverse range of areas I have interest in.

Experience

Founder, Grand Imam, Chief Researcher

OpenWeb3 Foundation

Apr 2021 - Present (2 years 5 months)

Founded Open Web3 Foundation (previously Setheum Foundation) to support the growth and development of the Setheum ecosystem. The Open Web3 Foundation was created to nurture and

steward ecosystem growth & development, R & D in technologies, use-cases and applications in the fields of decentralised web software protocols, particularly those which utilize modern cryptographic methods to safeguard decentralisation, to the benefit and for the stability of the Setheum ecosystem.

Founder, Grand Imam, Chief Architect

Setheum Labs

Nov 2019 - Present (3 years 10 months)

I am working on Setheum to build the Blockchain leading Web3.0 that solves a lot of issues and provides a lot of opportunities. Leading Setheum Network's design, a cutting-edge Web3 Cloud powered by Substrate. Revolutionizing industries with smart contracts.

Setheum Network is A Secure Confidential And Interoperable Decentralised Cloud Compute And Storage Network With A Layer-2 Infrastructure for Subchains and Smart Contracts.

We see a lot of blockchains coming up, yet we haven't seen many that have either solved the trilemma or effectively found reasonable equilibrium in the trilemma thus achieving a decent level of scalability, increased network security and a decent level of decentralisation. Setheum intends to be just that and more, it intends to be the most scalable blockchain network in the world while providing confidentiality for Subchains(Sidechains natively built into the network) and Cloud Computing and Storage Infrastructure for Web3 based Internet Solutions and Interoperability with both Web2 and other Web3 Networks.

Setheum is being built along with its first Subchain named "Khalifa", after Me, to signify its efforts and approach towards building Ethical DeFi Solutions. Khalifa Blockchain is designed for EVM-compatibility and optimised for DeFi, built on Setheum's native STEM (Setheum Trusted Execution Machine; built on TEEs) + DAGESTAN (Directed Acyclic Graph Engine for Succinct Trustless Asynchronous Networking; built using ABFT) Stack to make it the most scalable blockchain in the world.

Setheum achieves very high equilibrium in the trilemma by leveraging a Directed Acyclic Graph(DAG) to build the blockchain consensus making it a Blockchain via DAG, achieve instance finality, high throughput and subsecond blocktime while preserving network security and having a fairly decentralised network, Setheum's consensus system leans towards achieving high scalability and high security with an ethical, decent and equitably high level of decentralisation.

Member

Blockchain Research Institute

Aug 2022 - Present (1 year 1 month)

Building the future starts now, we are researching and developing on the amazing game-changing technology known as Blockchain Technology.

The BRI is comprised of more than 60 of the world's leading enterprises, governments, and academic institutions. As a Member of the BRI, I am a part of a global network of blockchain experts, researchers, and enterprise leaders from a variety of industries.

Member

RevGenius

Aug 2022 - Present (1 year 1 month)

RevGenius is an online community for sales, marketing, rev-ops, and customer success professionals. We offer an inclusive space to learn, share, and bond over the revenue industry experience.

Member

Modern Sales Pros

Aug 2022 - Present (1 year 1 month)

Modern Sales Pros is the world's largest community for sales leadership, management, operations, and enablement professionals and so why not because where else in the sales world?

Member

Internet Society

Dec 2018 - Present (4 years 9 months)

Open Source Contributor

Polkadot

2020 - Present (3 years)

Founder, Grand Imam, Chief Engineer

Slixon Technologies

Jul 2016 - Present (7 years 2 months)

Slixon Tech. was the beginning of my career in tech. Accidentally founded Setheum.. Founding Member of Setheum Labs. Now focusing on E-Commerce, Web3 Dev Services, Cloud Services Provision (especially for Setheum Cloud), Cybersecurity and AI R&D, Consumer Electronics R&D (NEW).

Visionary Director, Board Member

Obelisk Integrated Services Ltd.

Jul 2018 - Present (5 years 2 months)

Obelisk Integrated Services is a conglomerate that serves in the Real Estate, Transport, Agriculture and the Import & Export Industries.

International Sales & Project Manager

Green Intelligent Equipment (Shenzhen) Co., Ltd.

Sep 2022 - Oct 2022 (2 months)

At Green Intelligent, I specialize in International trade and sales as well as project management of Intelligent Industrial Machinery for the Industry 4.0 revolution. Active, Positive, Altruistic, Progressive, Responsible, Gratitude.. I love my time here at Green, developing my knowledge, skills, thought process, diversity, career and connections is of high importance. Relationships are strengthened along the way, skills are polished along the way, connections are made along the way. Involved in various industries at once is not easy, but it helps forge a thought process that helps in building innovative solutions to connect those industries in creative and nonobvious ways.

Business English Teacher (Part-Time)

APLUS Education

Sep 2022 - Oct 2022 (2 months)

Taught Business English to a Sales team of 31-40 year old adults.

Product and Sales Manager

Vogtec (H.K.) Co., Ltd

Jul 2022 - Aug 2022 (2 months)

Worked in sales and marketing, product management and engineering in VoIP telecommunications technology.

As a product and sales manager, my role is to oversee and manage the entire product lifecycle, from development to sales. I work closely with product development teams to define product features, specifications and pricing strategies based on market research and customer needs.

In addition, I lead the sales team, develop effective sales strategies, maximize revenue and achieve sales targets. This includes identifying potential customers, building and maintaining relationships with key accounts, and providing sales training and support to the sales team.

I also analyze market trends and competitor activities to look for opportunities for product improvement or new product development. Collaboration with cross-functional teams such as marketing, operations and customer service is critical to ensuring successful product launches and satisfied customers.

As a Product and Sales Manager, my role is to drive product success and maximize sales growth through effective product management and sales strategies.

English Second Language Teacher (Part-Time)

Freelance

Nov 2019 - Jun 2022 (2 years 8 months)

Taught various `English as a Second Language` classes of various ages ranging across 6-24 year olds in various different settings and arrangements.

Kindergarten English Teacher (Part-Time)

Freelance

Sep 2019 - Oct 2019 (2 months)

Taught English to 3-8 year old children in four different classes.

Creative Director

Obelisk Integrated Services Ltd.

Apr 2018 - Jun 2018 (3 months)

Obelisk Integrated Services is a conglomerate that serves in the Real Estate, Transport, Agriculture and the Import & Export Industries.

Project Manager

Obelisk Integrated Services Ltd.

Oct 2017 - Mar 2018 (6 months)

Obelisk Integrated Services is a conglomerate that serves in the Real Estate, Transport, Agriculture and the Import & Export Industries.

Sales Manager

Obelisk Integrated Services Ltd.

Jun 2017 - Sep 2017 (4 months)

Obelisk Integrated Services is a conglomerate that serves in the Real Estate, Transport, Agriculture and the Import & Export Industries.

Assistant Manager

Obelisk Integrated Services Ltd.

Aug 2016 - May 2017 (10 months)

Obelisk Integrated Services is a conglomerate that serves in the Real Estate, Transport, Agriculture and the Import & Export Industries.

Education

Weifang University of Science and Technology

Bachelor of Science - BS, Computer Science

Dec 2018 - Jun 2022

Informatics Education Ltd.

International Diploma in Information Technology and Communication, Computer Science

Apr 2015 - May 2016

Parliament International School, Apo, Abuja

Senior Secondary School

Sep 2013 - Mar 2014

Key Science Academy, Masaka

Senior Secondary School, Science

Sep 2012 - Jul 2013

Rightway Kiddies Academy, Abuja

Primary and Junior Secondary School

Sep 2007 - Jul 2012

Lufaloy Schools, Kano

Primary School

2005 - 2007

Skills

TypeScript • Engineering • Skill Development • Oral Communication • Creative Ideation • Project Performance • Architecture • Stakeholder Management • Digital Marketing • Project Management Software
